

THE STATE LIFE INSURANCE COMPANY®
ANNUITY CARE II

OneAmerica Care Solutions

*Single-Premium Deferred Annuity with
Built-In Continuation of Benefits*

ONEAMERICA®

OneAmerica® is the marketing name for the companies of OneAmerica

Supplement your strategy

In retirement, your assets generate your income. Reallocating an existing asset you won't need to use for income can help protect you against an unexpected long-term care (LTC) event. Supplement your financial strategy with a smart, stable option: Annuity Care® II.

Protecting your retirement income

Annuity Care II can help you convert your taxable assets to tax-free when they're used for qualifying LTC. As part of the OneAmerica® Care Solutions product suite, it uses a single premium deferred annuity to help protect your retirement income stream if the need for care arises. It also features a built-in continuation of benefits provision, funded through a monthly charge deducted from your base annuity, to extend the length of your protection. Your one-time premium can provide a tax-efficient way to help pay for LTC. And the company may credit a higher interest rate to amounts withdrawn for qualifying LTC expenses.

By choosing to pay with a single premium, you are guaranteed that no more payments will ever be required. Also, there are no unexpected premium increases sometimes seen with traditional long-term care insurance.

A tax-advantaged annuity
used specifically for LTC
can help protect your
retirement income stream.

How does Annuity Care II work?

Reallocating existing annuities into Annuity Care II can help maximize those assets if they're needed to pay for qualifying LTC expenses. And, any funds you don't use for LTC will pass on to your heirs.

Annuity-based products from OneAmerica Care Solutions feature two accounts: the accumulated cash value (AV) and the long-term care accumulated cash value (LTC AV). Your money is credited interest each month in both accounts, with a higher rate applied to your LTC AV, allowing higher growth to provide more assets to help pay qualifying LTC costs.

Withdrawals are allowed from the LTC AV to help cover qualifying LTC expenses, subject to the monthly LTC maximum amount and a 90-day elimination period.

Product highlights

- Provides 24 months of base LTC benefits for a single person, and 30 months for a joint contract
- Once the base is exhausted, the continuation provision kicks in for 3 years (ages 40 to 80).
- Features a minimum guaranteed interest rate credited to both accounts
- Allows fund withdrawals after a 90-day elimination period to help pay for qualified LTC
- Access up to 10 percent of the accumulated cash value (AV) with no surrender charges for non-LTC withdrawals.¹

1. *Partial surrenders will reduce the amount available for LTC expenses*

Tax advantages

Thanks to the Pension Protection Act (PPA) of 2006, annuity-based products funded with after-tax money (non-qualified funds) receive distinct tax advantages. Qualifying LTC expenses are distributed tax-free, whether from your base contract or the extended protection option.

1035 exchanges

You can exchange an existing non-qualified annuity for one that is eligible for the PPA advantages via either full or partial 1035 exchange. Be sure to discuss any taxability implications with your trusted financial professional.

How it could work for you

James, 55, non-smoker, in good health

James purchased Annuity Care II with a 36-month built-in continuation of benefits (COB) and 5% inflation protection using a single premium of \$100,000. When he needs care 25 years later, he is guaranteed benefits of \$3,000 per month for the first two years of care. Because he purchased inflation protection, his COB balance grew to \$9,000 per month for the next three years of care.

Your steps to get the care to meet your needs

Underwriting for Annuity Care II is slightly more flexible when compared to traditional LTC insurance. It consists of several health questions on the application and a brief telephone interview. No medical exams are necessary.

Benefit triggers²

Benefit payments are triggered in one of two ways:

You cannot perform at least two of six Activities of Daily Living (ADLs), which include bathing, maintaining continence, dressing yourself, eating/feeding yourself, toileting (including getting on and off a toilet) and transferring (like from a bed to a chair).

You require care as a result of a severe cognitive impairment (such as Alzheimer's disease).

LTC Withdrawals

Actual LTC expenses will be paid from the LTCAV, up to the stated monthly LTC benefit limit maximum.

The client will receive the lesser of the monthly LTC limit, or the actual charge for care.

Additional benefits

Bed reservations can “hold your spot” in a facility if you require more specialized care in a hospital for a period of time.

Respite care allows a primary caregiver to take a short break to travel or just have a few days off from providing care

2. To be eligible for benefits, the annuitant or eligible person (covered person) must be a chronically ill individual with qualified long-term care services provided pursuant to a plan of care prescribed by a licensed health care practitioner.

Cover your spouse

If you own an individual annuity, adding your spouse as an owner can involve a lot of paperwork. But there's a way to ensure your spouse can also enjoy the protection of your new LTC annuity. Transfer your existing non-qualified annuity with a single annuitant/owner via 1035 exchange into Annuity Care II and designate your spouse as an Eligible Person. This makes your spouse eligible to receive payments for qualifying LTC expenses. This is a simple way of securing access to LTC protection for your spouse who might not be listed as an owner or annuitant on your current annuity.

Annuity Care II provides more than LTC protection

Add your spouse to an individually owned annuity

Access up to 10% of your funds with no surrender charges for non-LTC withdrawals³

Claims Concierge to support you through the claims process

3. Partial surrenders will reduce the amount available for LTC expenses.

Looking to the future

Americans are living longer than ever with average life expectancy nearing 79 years in 2018.⁴ Annuity Care II provides options to help maximize your protection for as long as you need it.

Inflation Protection

This option can help protect against the rising costs of long term care expenses due to inflation. Inflation protection guarantees both the continuation of benefit balance and maximum monthly benefit limit will increase 5 percent each year, compounded annually. As costs increase, so does your monthly benefit amount.

The inflation protection option applies only to the Continuation of Benefits, and does not increase the amount available for qualified LTC during the initial period of care (24 months for a single insured, 30 months for two insureds). It must be chosen at the time of application, and may only be funded in addition to your single premium. Availability may vary by state.

Let us prove our commitment to helping you craft a sound financial strategy. Experience for yourself what it means to be our customer.
